

# LET US DO THE TRAVELING FOR YOU

The Certified Occupational Safety Specialist® course can be taught at your location.

EVERYWHERE  
YOU NEED US

## The Certified Occupational Safety Specialist® course can be taught at your location!

- Would you like your employees to obtain the Certified Occupational Safety Specialist® (COSS®) designation, but can't find a location close to you?
- Do you have a nearby COSS training location, but don't have room in your budget to pay your employee's travel expenses for an entire week?
- Or, perhaps you want a private COSS class with just your employees present?

Whatever the case may be, we can save you time and money by **coming to your location to train!**

If you have a group of employees you would like to participate in the COSS class, we can come to your location, and provide the instruction you need for the entire week, at a price you can afford. Instead of paying travel expenses for all of your employees to earn the COSS designation, why not just pay the travel expense for one person (the COSS instructor), and get all of your employees trained at the same time!

### Take the Guesswork Out of Travel Costs

Our instructor's travel fee is a set flat rate; therefore, you will know, upfront, exactly how much you will be invoiced for.

*COSS classrooms must meet certain room layout and multimedia requirements.*

## The Certified Occupational Safety Specialist® program is an intense, curriculum-based certificate course for safety practitioners.

COSS graduates will receive:

- The 3-year National COSS designation
- The two 10-hour OSHA cards of completion for Construction & General Industry
- A resource disk with helpful safety links
- Easy-to-read OSHA Code of Federal Regulation books for Construction and General Industry
- Fundamentals of Occupational Safety and Health textbook
- A COSS embroidered briefcase
- A COSS embossed padfolio with pen & calculator
- The COSS student workbook
